

Poster Guidelines and Submission

APPLICATION DEADLINE EXTENDED TO MAY 1, 2019

The first Health Meets Food: The Culinary Medicine Conference™ is now accepting applications for Faculty, Resident and/or Student Posters for the First Annual Poster session to be held June 8-10, 2017 in New Orleans.

This is the opportunity to showcase how your school has utilized the Culinary Medicine in teaching and patient intervention and for others to learn of the outcomes you have had. Show attendees the many ways in which culinary medicine has been taught, appreciated and demonstrated usefulness in your patient and student population. Student submissions are most encouraged.

Email your completed application and IRB approval (if applicable) to rosielorenzetti13@gmail.com

Poster submissions will be peer-reviewed for academic content and interest
Accepted applicants will be notified by May 15, 2019

Guidelines to Complete Original Research Application Form

1. Title	Place title of project at top of Abstract.
2. Purpose/Hypothesis	State objectives/hypothesis/purpose of this project
3. Methods/Design	Retrospective, prospective, pre-post, randomization, blinding, etc.
a Outcomes Measures	What are you measuring? e.g. change in blood pressure, weight etc.? student knowledge? Patient confidence to change behavior?
b Study Setting	Name of institution where study took place; what clinic; in/outpatient setting?
c. Participants	Inclusion/exclusion criteria; Number entering and finishing study.
4. Results	State main findings with statistical procedures and statistical significance, if appropriate.
5. Conclusions	State conclusions and clinical applications if any.
6. Support	List source(s) of support in the form of grants, equipment, drugs, etc.
7. IRB	Attach proof of appropriate Institutional Review Board (IRB) approval from your home institution.

Guidelines to Complete Educational Endeavor Application Form

1. Title	Place title of project at top of Abstract.
2. Introduction	State topic and why it is important.
3. Description	Describe essential elements needed to understand the project accomplished.
4. Summary	Discuss evidence from one's own observations and from pertinent literature that supports one's conclusions. State how this information is useful clinically, and can be replicated at other institutions.
