</table>

Preparation:
1. Gather all ingredients and equipment.
2. Heat oil in a small pot on medium high heat until the oil is warm but not hot (you want to avoid burning the oil, if it is smoking, it is too hot).
3. Add garlic to oil and infuse on low heat for about 25 minutes.
4. Remove from heat and let sit uncovered for at least two hours or overnight.
5. Strain garlic oil into a clear glass jar using a fine mesh strainer or cheesecloth. Make sure to remove all garlic pieces from the oil.
5. Seal jar and store in the refrigerator.
